John,

Here's the Corps response. I-jobs is state money that would come to the City - correct?

Hi Pam,

That's right – under the current authorization, the only restriction on the source of the City's cash contribution is that it can't be Federal funds. State, City, or other local funds are acceptable. I don't know what I-Jobs is – is the "I" for "Iowa" (i.e. are these State funds)? If so, it looks okay. We'll probably want to know if they're going to send cash directly to the Corps (so we can know what it's for when it comes and properly account for it), or if they're going to send funding to the City who will in turn write the check to the Corps.

-Tom

Toby / Tom,

Please see the question below. Is it safe to assume, short of receiving federal funds from another source, the Corps doesn't have an issue with the source of funds used for the local share?

Pam

Pam,

Could you ask the Corps if funds from I-Jobs can be used as a portion of the City's share for the levee rebuild. The City would like to submit an application to I-Jobs for \$2,250,000 to assist the City's obligation to the USACOE.

Thanks,  
 John
